Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-6, and 20, in the reply filed on 1/17/06 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 5, and 20, are rejected under 35 U.S.C. 102(e) as being anticipated by Toyoda et al (P.N. 6,700,605).

Toyoda et al discloses a surveillance system that shows all the limitations recited in claim 1, including the feature of recording pictures shot by a plurality of monitoring cameras and reproducing the recorded pictures or live pictures shot by the monitoring cameras (See Toyoda et al's Figure 1, components 6-8, 13, and 9-12), the feature of the relevant monitoring camera information, recording condition information and display condition information for each monitoring areas and the shot pictures being recorded and the live picture being displayed based on the relevant camera information, recording condition information and the display condition information as specified in the present claim 1. (See Toyoda et al's column 2, lines 49-53, column 4, lines 57-62).

With regard to claim 5, the feature of the displayed picture being switched to live picture corresponding to relevant monitoring camera information in the specified monitoring area when the monitoring area to be displayed is specified as recited thereof is present in Toyoda et al. (See Toyoda et al's claims 3-4).

With regard to claim 20, the feature of recording live picture with an identifier appended thereof without displaying the live picture as specified thereof is inherently present in Toyoda et al. Because the user can always turn off the display while performing recording operation of the live picture on the provided VTR as shown in Toyoda et al. (See Toyoda et al's Figures 1-2, and the corresponding disclosure).

4. Claims 2-4, 6, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tanaka discloses a monitoring system including a plurality of cameras and display means.
